Telepsychiatry Agreement

Remote videoconferencing sessions may be utilized when clinically appropriate. The same limits to confidentiality apply for remote sessions that apply for in-person, email and telephone contacts also apply to videoconference sessions.

Insurance companies may not necessarily accept the procedure codes and provide reimbursement as they would for in-person/in-office sessions. The invoices you receive will indicate the type of session, the procedure code and indicate that these are remote telepsychiatry sessions.

Your signature below verifies that you have been informed of the potential coverage limitations and also that you agree to be within the state of New Jersey during all telepsychiatry appointments.

Patient's Signature (or guardian if patient is a minor)
